As one of the UK's largest importers and distributors of timber, we're your trusted supplier of hardwood.

Our extended range of stock profiles and sizes, with quicker delivery times, is now available for our most popular hardwood species of Oak and Meranti.

Offering a natural looking product for internal finishings, our hardwood is the perfect solution for skirtings, facings, window boards and door frames.

## Hardwood Made Easy

### 48 - 72 Hour Delivery

When it comes to timber deliveries, we know time is of the essence. That's why we've reduced the lead times for all orders on our stock selection of pre-machined Oak and Meranti so that they reach you **48-72 hours** from time of ordering. That's hardwood you hardly wait for.

### To us, a limited choice goes against the grain

That's why we've expanded our stock offering of pre-machined Oak and Meranti, to ensure you have access to what you need, when you need it. Check out the table overleaf for information on our stock sizes and the profiles available on our 48-72 hour delivery.

### Signed. Sealed. Delivered.

We want your delivery to reach you looking just as good as it did when it left us. That's why our stock hardwood range is protected with **heat sealed clear envelope wrapping**, to protect it on its travels. Not only does it make it easier for you to handle on receipt, but it also protects the product from dirt and dust, as well as the elements.

**Our hardwood range will be supplied machined, bundled and wrapped.**

We've extended the range of two of our most popular hardwood species to meet your requirements:

### North American White Oak

Originating from Eastern and Central North America, this hardwood is perfect for interior uses including internal finishings as well as flooring, furniture and joinery. A versatile wood, its natural appearance and light colouring makes it a popular choice. It can also be stained, sanded, glued and polished.

### Meranti

Part of the Mahogany family, Meranti originates from Eastern Asia and its pigmented red-brown colour provides a more exotic look. Highly versatile and moderately durable, Meranti is often used for windows, conservatories and doors, as well as being suitable for exterior uses such as cladding, when treated correctly. Also, thanks to its board density, Meranti is often used for fire door frames.

Our wider range of other hardwood species are available on request, on our standard delivery service, including:

- African Iroko
- European Beech
- European Oak
- North American Maple
- North American Tulipwood/Poplar
- North American White Ash
- African Sapele
- Black Walnut
- American Cherry
- North American Western Red Cedar
- Accoya
- African Utile

The following profiles are available as part of our stock selection - please refer to our table overleaf for detailed sizing and profile information:
